

Who we are: A Fort Worth, Texas company that builds data platforms, maps assets, and delivers analytics for energy companies, mineral and land acquirers, infrastructure developers, and the teams that screen and close deals. We combine proprietary data, geospatial analysis, custom software, and applied AI to solve the parts of the workflow that off-the-shelf products leave unfinished.

CAPABILITIES

What We Do

Mineral & Land Acquisition Intelligence

The data work that closes mineral and land deals.

- County ownership data assembly and owner list building
- AI-powered legal description mapping: turn a deed's metes-and-bounds straight into a mapped tract
- Acquisition analytics and intelligent targeting to screen more deals, faster
- End-to-end targeting pipelines, from deal screening through AI-drafted, personalized owner outreach

Production & Competitive Intelligence

Know what your competitors are doing before they announce it.

- 30+ years of production history and decline-curve analysis for 1M+ wells
- Operator benchmarking: who's drilling where, with what results
- Live drilling-permit tracking, updated daily
- Lasso an area on a map and get instant analytics, exports, and CSVs

Infrastructure & Site Intelligence

Geospatial data turned into site-selection decisions.

- Data center siting and power-adjacency analysis
- Transmission corridor and pipeline routing
- Energy infrastructure mapping for expansion and development planning

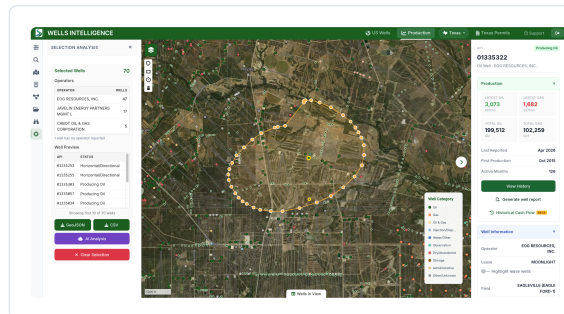

AI Enablement & Custom Platforms

When off-the-shelf doesn't cut it, we build what you actually need.

- Governed AI automation for deal evaluation and back-office work: data-room diligence, document review, and reporting, with human oversight built in
- AI document processing for lease abstraction, title runsheets, and division orders, with professional review in every workflow
- Custom platforms for asset mapping and spatial analysis, plus dashboards built to your KPIs
- Proprietary data integration with your AI systems and existing workflows

PLATFORMS

Our Products

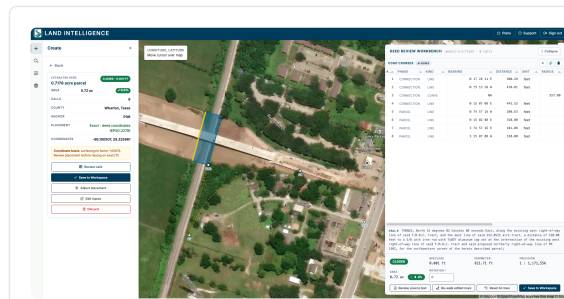

Wells Intelligence

AVAILABLE NOW

Draw on a map, get instant analytics.

Production analytics for every Texas oil and gas well. 30+ years of history, real-time permits, operator benchmarking, custom watch areas, and API access.

Land Intelligence

COMING SOON

Drop in a legal description, get a mapped tract.

A project workspace for land professionals. AI-assisted deed plotting with closure math, GIS imports and exports, and Texas survey and abstract context under every tract.

THE DIFFERENCE

Why Clearfork

Proprietary data. Curated datasets covering millions of wells, mineral ownership records, permits, and infrastructure assets across 30+ states.

Recognized geospatial expertise. Our tools are used by thousands of analysts across industries, with deep specialization in energy and land data.

AI that ships results, not demos. Deal-evaluation and back-office automation deployed in live client engagements today, not slideware.

We meet you where you are. Modernizing legacy workflows, standing up your first data platform, or wiring AI into existing processes, whether you need platform access or fully custom development.
